

Pandemic measures

Procurement and distribution of special badges for accessing the factory from CHEMPARK pandemic level 4

ATTENTION: Level 4 has **not been triggered yet**

Access to CHEMPARK will be restricted to the minimum employees essential for maintaining production and business operations upon issue of the highest pandemic level (level 4). Only those with key functions will receive special badges to continue entering the factory.

Proceed as follows to obtain badges for your employees and your external employees in essential capacities:

- As a CHEMPARK partner or CHEMPARK service partner, **report the number of special badges you need** for your employees with key functions to: andrea.biyda@currenta.biz. Essential employees from external companies you have commissioned require a special badge. Specify the number for these badges separately.
- Do not forget to designate a **contact for accepting** the badges.
- **CHEMPARK factory security** will hand over the specified number of special badges to the named contact.
- As a CHEMPARK partner or CHEMPARK service partner **you are responsible for distributing badges** to your employees and the employees of external companies you have commissioned.

Delivery of goods

- Supplies of goods to CHEMPARK will be delivered to CHEMPARK as usual, **without special badges**. However, fever scans will be performed on everyone in the vehicle, as at all factory entries.
- **Exception: In case of regular trips or commuter traffic** (e.g. transportation between production facilities and the CURRENTA disposal facilities), include a **special badge for the driver** of the lorry. Take the corresponding number into consideration when reporting how many badges you need for external employees to the pandemic coordinator.

Important information regarding use of special badges

- The special badge is **only valid in conjunction with a CHEMPARK badge with a photograph**.
- The badge is **linked to the status of the key function** and must not be passed on to others.
- It only applies for the duration of CHEMPARK pandemic level 4 and must be returned afterward.

Changes in levels will be announced EXPLICITLY on the existing information channels.
