

Pandemic measures

Admission of vehicles with passengers into CHEMPARK

Since 22 March, social distancing measures have been in place throughout Germany. These measures include the requirement to maintain a minimum distance of 1.50 m from other people. This regulation also applies in public road traffic. Since the required minimum distance cannot be observed inside a vehicle, car journeys with more than one passenger are not permitted.

Protective mask requirement for 2 people or more

Journeys which are essential for work purposes are permitted, including journeys with more than one passenger. The same rule applies to CHEMPARK. Prerequisite: Everyone in the vehicle must wear a mask which covers their mouth and nose or a superior FFP mask. Without such protection, there may only be a maximum of two people in the vehicle and the maximum possible distance between the passengers must be ensured. Therefore, a passenger may not sit on the front passenger seat.

Vehicles with more than one passenger in which passengers are not wearing a mask which covers their mouth and nose are not permitted to enter CHEMPARK.
